

Application:

**Caustic Washdown
of Poultry Processing
Equipment**

Anyone who thinks poultry processing is just another washdown application has never been in a chicken plant! That's why poultry processors around the country choose Boston Gear's wide range of entirely stainless steel speed reducers and motors.

Robust enough to take the most caustic washdown, strong enough to go 24/7, and priced so they won't break the bank. And like other leading Boston Gear products, they are in stock and backed by the Boston Gear guarantee.

Product Solutions for
**The Poultry
Industry**

Poultry Processing

Stainless Steel Speed Reducers

Product Features:

- 316 stainless steel housings, bearing carriers and flanges to withstand hostile washdown environments.
- 304 stainless steel output shaft
- Double lip, shaft seals for superior performance and leak resistance
- PosiVent™ system eliminates breather vent and keeps contaminants out
- Lubricated for life with Mobil® SHC634 synthetic oil, providing wide temperature ranges, maximum efficiency and long, maintenance-free operation

Product Line Specifications:

- Center Distances: 1.75", 2.06" and 2.62"
- Reducer Ratios: 5, 10, 15, 20, 25, 30, 40, 50 and 60:1
- Available in both solid and hollow output shafts
